

HILARY TERM 2026

SCHEDULE OF ACTIVITIES

TRAINING

EXTERNAL EVENT

INTERNAL EVENT

JANUARY 2026

21 JAN

[AI for Coding: "Intelligent AI Agents at Work: Transforming Content Analysis with IntelliDoc" A Hands-On Guide for Oxford Academics and Researchers](#)

This comprehensive 90-minute course introduces Oxford academics, researchers, and staff to IntelliDoc, a revolutionary AI-powered platform that transforms how we interact with documents and automate complex workflows.

21 JAN

[Vice Chancellor's Colloquium Session 1](#)

Invitation only

21 JAN

[AI Build Club](#)

If you're using AI to build custom bots, apps, tools, automations or workflows that help you get work done, come chat about what you're doing and how you're doing it--builds can be AI or AI-enabled.

23 JAN

[AI for Researchers: AI and Research: From Personal Productivity to Building Your Own Tools](#)

This full-day workshop will equip researchers with comprehensive knowledge and practical skills for integrating generative AI throughout the research lifecycle.

27 JAN

[Mapping the Landscape: Introduction to Coding with AI for Everyone: Empowering Non-Programmers to Create with AI](#)

This session explores how AI-powered coding tools are democratizing software development, enabling individuals with little to no programming experience to build functional applications.

27 JAN

[Vibecoding as pedagogy: Transforming learning and teaching through making tools](#)

Webinar on "vibecoding" as AI-assisted software development for educators, covering agentic AI tools, examples, and ways to integrate them into teaching.

28 JAN

[Kellogg and AI Learning Lectures: Neural networks in minds and machines](#)

This event is part of a series of "AI Learning Lectures", which is organised by Kellogg College and the AI Competency Centre at Oxford. Open to all Oxford University staff and students, these sessions are designed to boost understanding of developments in AI and build confidence in using emerging technologies.

JANUARY 2026 (CONT.)

29 JAN

[AI in Education: AI in the Writing Process: Rethinking Authorship and Assessment](#)

This workshop explores the use of generative AI in academic writing, examining its impact on authorship and academic integrity.

29 JAN

[AI Competency Centre Presents at Oxford Digital Scholarship Society](#)

OxDSS member-only event. Presentation by Kelly Webb-Davies to Oxford's student society, the Digital Scholarship Society

FEBRUARY 2026

03 FEB

[AI in Education: Beyond Detection: Navigating AI Tools and Ethical Practice in Education](#)

This workshop aims to bridge these knowledge gaps by critically examining limitations and ethical dilemmas in detection methods, and then introducing educators to the latest AI tools available to students.

03 FEB

[Building Large Language Model Powered Chatbots with Microsoft tools - No programming experience required](#)

This hands-on course equips non-technical professionals with the skills to design, build, and deploy intelligent chatbots using Microsoft Copilot Studio—no coding required.

03 FEB

[BALEAP TELSIG Online Symposium](#)

The Technology-Enhanced Learning SIG (TELSIG) upcoming online symposium, the theme for this year's event, Tech, Teaching and Togetherness, invites colleagues across the BALEAP community and beyond to reflect honestly on the challenges and joys of teaching with (and sometimes without) technology.

04 FEB

[AI in Education: Risks, Innovation and Morality](#)

Discussion panel - collaboration between The World Reimagined and Rhodes Trust

05 FEB

[AI for Strategic Thinking and Operations: Thinking About Thinking with AI: Why Self-Knowledge is Your Real Interface](#)

This session isn't about learning to prompt better — it's about learning to think better, because AI mirrors whatever thinking you bring to it.

09 FEB

[Kellogg and AI Learning Lectures: Building Confidence in AI](#)

This session focuses on developing a practical working relationship with AI – one that integrates seamlessly into daily routines without adding time pressure or reducing the satisfaction of meaningful work.

FEBRUARY 2026 (CONT.)

09 FEB

Academic Skills Network Meeting: Using AI Tools for Academic Skills Development

An Academic Skills Network meeting, facilitated by the Centre for Teaching and Learning, exploring how AI tools can support students' academic skills development, with a practical presentation and discussion.

09 FEB

MondAI Roundup

Round up of new developments in AI in the last month. This will cover new models, new tools, new features, new research on AI in academic contexts, and new tips and ideas that people have shared over the last month.

10 FEB

Mapping the Landscape: Introduction to Open Source and Local AI Models: Running AI Locally from Laptops to Servers

This session explores how AI-powered coding tools are democratizing software development, enabling individuals with little to no programming experience to build functional applications.

11 FEB

Love Research Data 2026

To coincide with the annual International Love Data Week, Research Data Management (RDM) support colleagues and services from the University of Oxford will be on hand for anyone wanting to learn more about how the University provides love and care for its valuable data collections

12 FEB

AI for Strategic Thinking and Operations: 10 Truths About AI That Will Stand the Test of Time

This session unpacks ten foundational principles that apply no matter what version of GPT, Claude, or open-source model you're using. These are the truths that separate real impact from shiny hype.

12 FEB

AI for Coding: From Zero to App Development with Generative AI

This course aims to demystify application development by introducing participants to AI-powered coding tools that eliminate the traditional barriers to programming.

18 FEB

AI Build club

If you're using AI to build custom bots, apps, tools, automations or workflows that help you get work done, come chat about what you're doing and how you're doing it--builds can be AI or AI-enabled.

19 FEB

AI for Strategic Thinking and Operations: Revealing Unknown Unknowns: How to Use ChatGPT as a Strategic Mirror

This session explores how to turn ChatGPT into a strategic mirror — a partner for reflection that surfaces blind spots, forgotten commitments, unspoken tensions, and high-impact opportunities hiding in plain sight.

22 FEB

Kellogg Bletchley Park Week

A series of events to celebrate a connected history of learning and collaboration between Kellogg College and Bletchley Park.

FEBRUARY 2026 (CONT.)

23 FEB

Cambridge AI Consortium

Invitation only AI consortium hosted at Cambridge University

24 FEB

AI in Education: AI in the Writing Process: Rethinking Authorship and Assessment

This workshop explores the use of generative AI in academic writing, examining its impact on authorship and academic integrity.

MARCH 2026

02 MAR

AI in Education: Beyond Detection: Navigating AI Tools and Ethical Practice in Education

This workshop aims to bridge these knowledge gaps by critically examining limitations and ethical dilemmas in detection methods, and then introducing educators to the latest AI tools available to students.

03 MAR

Nuffield Department of Medicine AI Ambassador Event

Invitation only AI ambassadors event for Nuffield Department of Medicine Staff

03 MAR

Mapping the Landscape: Understanding AI Agents: From Simple Assistants to Autonomous Systems

This session will explore the emerging landscape of AI agents and clarify what constitutes an "agent" in the context of artificial intelligence.

05 MAR

Compassionate Assessment in HE network Webinar

Kelly Webb Davies will be speaking for the Compassionate Assessment in HE network

07 MAR

OxAI Student Society Conference

Members-only Oxford AI Student Society Annual Conference.

09 MAR

Staff AI Ambassador Event

Invitation only event for AI Ambassadors

MARCH 2026 (CONT.)

09 MAR

MondAI Roundup

Round up of new developments in AI in the last month. This will cover new models, new tools, new features, new research on AI in academic contexts, and new tips and ideas that people have shared over the last month.

11 MAR

AI Build Club

If you're using AI to build custom bots, apps, tools, automations or workflows that help you get work done, come chat about what you're doing and how you're doing it--builds can be AI or AI-enabled.

12 MAR

Building a relationship with AI

This session is on using AI effectively by understanding its foundations, identifying workflow bottlenecks, and applying the right tools to achieve consistent, high-quality outcomes.

17 MAR

Radcliffe Department of Medicine Day

AI Competency Centre exhibits at Radcliffe Department of Medicine's internal yearly symposium.
